DETAILED ACTION

The Examiner used the wrong name, Behringer, to identify the prior art reference (DE 196 15 144). For clarity the Examiner has changed the names on the rejections to reflect the correct name, Feldenz.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Feldenz (DE 196 15 114).

Feldenz discloses an amusement device comprised of a vehicle 2 that can be moved over an elongated track 6 and a track portion 12. The track portion-can-be moved jointly with the vehicle from a first lower position to a second higher position. The track portion moves first in a horizontal direction and then to a vertical direction. In the Feldenz reference the track portion is attached to a large wheel. As the wheel moves the track portion, stays perpendicular to the wheel, and moves around and therefore moves in a horizontal direction and a vertical direction as the wheel spins brining the track portion from the track on the right side of the figure to the continuation of the track on the left side of the figure.

Art Unit: 3617

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feldenz (DE 196 15 114) in view of Kockelman (US 6,342,017).

Feldenz discloses the amusement device as disclosed above. However, Feldenz does not show the track portion to be moved with the use of pulleys and cables.

Kockelman discloses an amusement device using pulleys and cables to move a vehicle from a lower position to a higher position. It would have been obvious to one of ordinary skill in the art to have applied pulleys and cables, like that of Kockelman, to an amusement device, like that of Feldenz, in order to provide for smoother and more efficient movement of the track portion from one-position-to-the-next.

Allowable Subject Matter

Claims 6-34 are allowed.

Response to Arguments

Applicant's arguments filed 10/04/04 have been fully considered but they are not persuasive. Applicant argues that the prior art does not disclose the features in the above rejected claims. The applicant states that the prior art does not show the vehicle to move to an angle to provide excitement to the passengers of the vehicle. The prior art of Feldenz discloses a vehicle moving in an arc from a lower level to a higher level. It is

Art Unit: 3617

understood that when moving in an arc one is moving at a given angle from one position to another. By elevating the vehicle would be a sufficient move to allow for passengers to achieve a level of excitement from the change in height.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ngai (US 6,173,654) discloses an amusement device with a moveable track portion.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. McCarry, Jr. whose telephone number is (703) 305-0581. The examiner can normally be reached on Monday through Friday 8:00am to 5:00pm.

Application/Control Number: 10/612,543

Art Unit: 3617

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Joseph Morano can be reached on (703) 308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
